### WORK EXPERIENCE

---

Founding AI Engineer | AI Squared — Melbourne | May 2024 – June 2026

- Worked as a Forward Deployed Engineer, partnering closely with stakeholders to scope requirements, design AI solutions, and deliver production-ready implementations.
- Architected and developed end-to-end agentic workflows using LangGraph to orchestrate complex, multi-step reasoning, planning, and task execution across multiple AI agents.
- Designed Retrieval-Augmented Generation (RAG) pipelines that combined semantic search with contextual retrieval to improve response accuracy and reduce hallucinations.
- Implemented asynchronous workflow execution, state management, and memory persistence for long-running AI agents, improving reliability and scalability.
- Designed a high-performance data caching architecture using Supabase and PostgreSQL, reducing redundant database queries by 70% and significantly improving response latency.

AI Engineer | Australian Red Cross Lifeblood — Melbourne | July 2025 – November 2025

- Developed a GenAI serverless web application deployed on AWS and Azure as part of Work Integrated Learning (RMIT - Master of Information Technology).
- Implemented Retrieval-Augmented Generation (RAG) pipelines using vector databases to retrieve and contextualize data from multiple file types.
- Integrated the RAG pipeline with an internal chatbot to enhance information accessibility and knowledge-based query handling.
- Ensured secure data processing, low-latency response, and high availability for production-grade AI systems.

Software Developer | Arcon Techsolutions — Mumbai | Jul 2023 – Feb 2024

- Developed and maintained enterprise-grade backend APIs using .NET Core and MySQL.
- Architected and optimized RESTful microservices for security analytics products.
- Enhanced API performance by 30% and implemented role-based authentication modules.
- Worked closely with QA and DevOps teams to ensure seamless CI/CD integration and deployment.

### AI PRODUCTS BUILT

---

FOUNDER - ShareMyVault

Link: <https://www.sharemyvault.com/>

- Founded and developed an AI-powered digital estate planning platform focused on making wills and legacy planning accessible to seniors and non-technical users through intuitive conversational AI.
- Built a cross-platform mobile application using Flutter with on-device (local) AI inference, enabling private, low-latency assistance without requiring continuous internet connectivity.
- Designed AI-driven conversational workflows that simplify complex legal and estate planning concepts into easy-to-understand, step-by-step guidance for users with varying levels of digital literacy.

- Implemented intelligent document generation pipelines that transform natural language conversations into professionally formatted, legally structured wills and estate planning documents.
- Designed a secure, privacy first, zero knowledge backend using Supabase and PostgreSQL with encrypted document storage, authentication, and scalable cloud infrastructure.

## FOUNDER - AgentLens

Link: <https://agentlens.in>

- Designed and deployed an end-to-end GenAI platform that evaluates websites for AI search readiness across accessibility, structured data, crawlability, and LLM interpretability.
- Engineered autonomous site-crawling pipelines with robots.txt parsing, multi-page exploration, metadata extraction, and WCAG accessibility audits.
- Built Retrieval-Augmented Generation (RAG) pipelines combining real-time web data with OpenAI LLMs to generate context-aware website assessments.
- Developed AI simulation agents that emulate how modern LLMs such as ChatGPT, Gemini, and Perplexity interpret and retrieve website content.

## SKILLS

---

- Python, TypeScript, Java, C#
- LangGraph, Retrieval-Augmented Generation (RAG), LangGraph, Multi-agent orchestration
- AWS, Supabase, Azure
- Flutter, Next.js, Vue.js, [Node.js](#)

## EDUCATION

---

RMIT University | *Master of Information Technology (AI)*

Mumbai University | *Bachelor of Engineering (Computer Engineering)*

## ADDITIONAL EXPERIENCE

---

Wildlife Rescuer — RAWW (Mumbai)

Assisted in the rescue, rehabilitation, and care of diverse species. Led awareness drives on urban wildlife protection and trained volunteers for safe animal handling and emergency response operations.

Trek Leader — Mountain Marks

Organized and led multiple high-altitude treks across the Western Ghats. Managed logistics, safety, and route planning for large groups, emphasizing leadership, endurance, and team collaboration.
